

The Space-a-ling

Far beyond the sun,
far beyond the stars,
far beyond the planets,
like Mercury or Mars,
way, way out in space,
where you cannot see a thing,
somewhere in the darkness
there floats a Space-a-ling!

The Space-a-ling's a creature
who lives in outer space,
and I don't know what he's like,
'cause I've never seen his face.
But I've heard he's out
there somewhere,
far beyond the stars,
far beyond the planets
like Mercury and Mars.

And he's waiting,
yes, he's waiting,
where you cannot see a thing,
and when he comes
to Earth one day,
you'll see that Space-a-ling!
